

Tagless/ Label Pallets

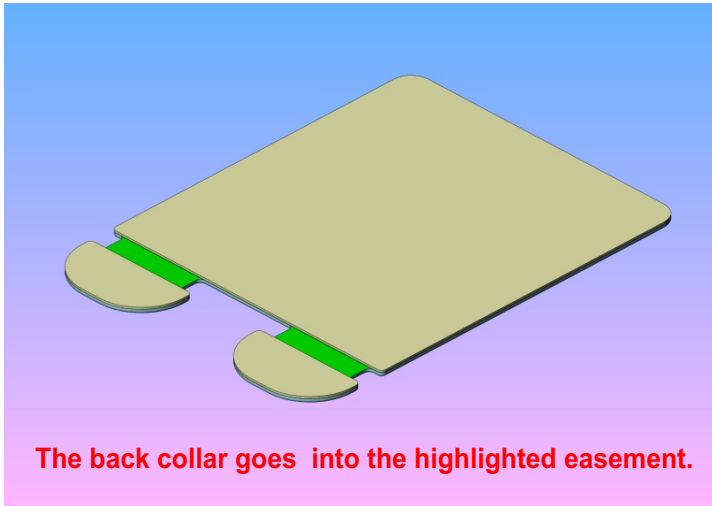

- ⊕ Pallets
- ⊕ Squeegees
- ⊕ Floodbars

The Tagless Pallet was developed to improve the quality & production rate of printing the inside labels of a shirt.

Two shirts are loaded at the same time on the Tagless pallet.

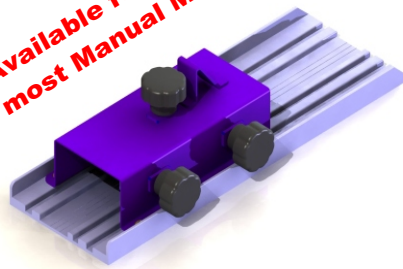

The back collar goes into the highlighted easement.

The Tagless Pallet is a 16 x 22 pallet with special front edge shaping that allows you to quickly load 2 shirts on the same pallet and print how ever many colors you would like. The tag print platform is 6 inches wide and 3" high - at it's high point is sized for adult shirts.

Available for use with most Manual Machines

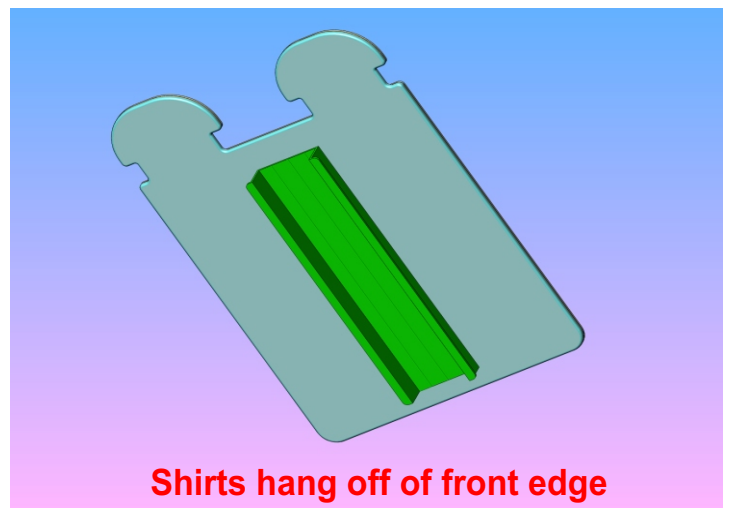

Pallet Size
Print Area

16 x 22	
Adult Label	6 x 3
Youth Label	4 x 1.5

Why Tagless? No one likes the labels inside a shirt. They cost money to produce and sew in, and then the person wearing the shirt will often rip or cut the tag out because they are uncomfortable. Ripping the tags is a leading cause of shirt death. This special pallet easily allows you to load the shirt onto your press and print the label.

Most tagless printing is accomplished by either using preprints and a heat press, or by turning the shirt inside out. Both of these processes are very time consuming. The effort to turn the shirt inside out and restack them for printing could be an all day job. Then they have to be turned right-side out and again smoothed and prepared for packaging.

One Size fits all adult.
One Size fits all youth.

Shirts hang off of front edge
