

Walz-Schenk Style Pallets

Purpose & Features

Action Engineering has developed & refined Honeycomb Aluminum Pallets since 1994. They are in stock awaiting your order and can ship almost immediately. Our focus on these products has resulted in a level of service that is the best.

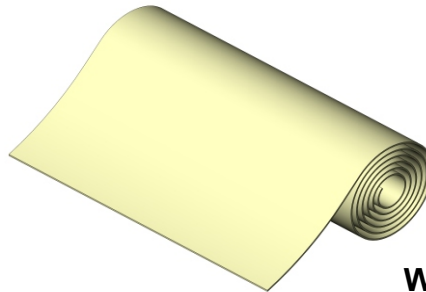

Honeycomb Aluminum with or without Soft Top Rubber

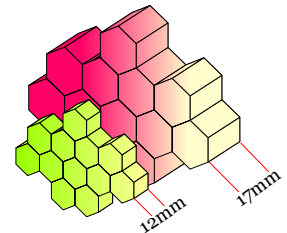

Our 12mm thick HoneyComb Aluminum is Clear Coat Anodized, finished using all Solid Aluminum inset framing. We pioneered the technique of finishing Honeycomb with solid aluminum framing and like all of our products, we have continuously focused on making it better & better! Precision Machined Brackets

All of our products for your MHM machinery are interchangeable with your original equipment. Considerable care & attention is given to matching the heights of the pallets, squeegees & floodbars to your originals.

Add Soft Top Rubber to your Honeycomb Aluminum pallet and you have the flattest, lightest, most print and flash friendly shirt board in the world. There's a good reason it's so popular. The only downside-it costs a bit extra. Find out why.

Our 1/2" material has more glue and less weight.

Available Sizes

S or E - Type Machines	
128mm x 800mm	4 x 31 1/2
128mm x 800mm	5 x 31 1/2
200mm x 800mm	8 x 31 1/2
250mm x 800mm	10 x 31 1/2
300mm x 800mm	12 x 31 1/2

610mm x 1000mm	24 x 39 1/2
710mm x 1000mm	28 x 39 1/2
710mm x 1200mm	28 x 47

Why Our Honey-Comb is the Best
Action Engineering has manufactured honeycomb aluminum pallets since 1992. We only use 12mm Thick Honey-Comb Aluminum. While other manufactures have attempted to use either thinner or thicker material we have standardized to what has become the obviously best composite for Textile Printing Pallets.

Specialty Pallets
are available for you Schenk
