

Warrior Extreme Pallet System

Warrior **XPS** Accessories

Extreme Pallet System

Table Top Load Assist System

Easy Interface of Pallet to Load Assist Base

The Pallets have been machined in the rear to be easily mounted onto the Load Assist Base Pallet. A Spring Hinge in the rear of the base pallet has locators which lock the pallet into it's base.

Lift & Lower Assembly

A Destaco Handle is used to lift & lower the top floating pallet to an angle which allows a shirt to be loaded or unloaded.

On-press Loading

This lift and lower assembly has benefits over the Side Shifting option pictured above. Please contact us to discuss the advantages.

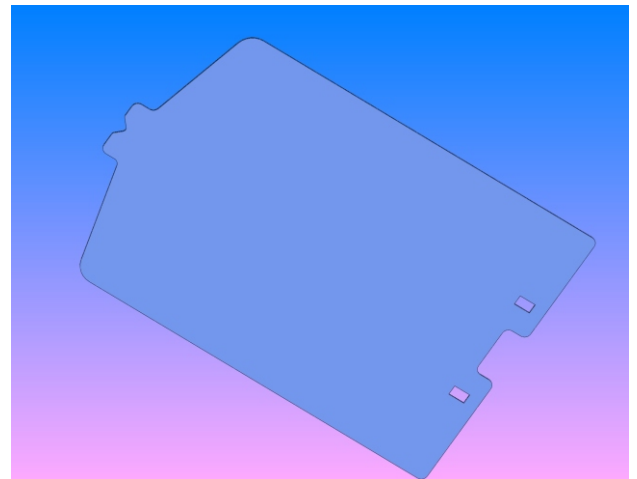

Available Pallet Geometry

Standard Straight Body Pallets - Multiple Sizes

Double Half Wing - Multiple Geometries

Full AOP with Pivoting Wings - Multiple Sizes

Warrior Pallets are available in 11 different sizes to perfectly match any t-shirt size. It is recommended that extra pallets be ordered to improve production times on-press.
